

OAKWOOD ACADEMY

COVID-19 FAMILY SCREENING FORM

Oakwood is committed to keeping our community's health and safety our top priority. Part of our Health and Safety policies includes families complete this screening form prior to your child's entrance each day. If we do not receive this completed screening form **before 8:00 am**, your child will not be permitted to attend school or sessions.

Student's Name (Last, First): _____

Date of Birth: _____ / _____ / _____
MM DD YYYY

1. Does your child have ANY of the following new or worsening COVID-19 symptoms?*

a) Fever (37.8C or higher) and/or chills	Yes	No	In-home daily temperature read _____
b) Cough or barking cough	Yes	No	
c) Shortness of breath	Yes	No	
d) Decrease or loss of taste or smell	Yes	No	
e) Nausea, vomiting, and or diarrhea	Yes	No	

2. Do any of the following apply to the student/child? (if yes, skip questions 3, 4, and 5)
 - They are fully vaccinated against COVID-19 (it has been 14 days or more since their final dose of either a two-dose or a one-dose vaccine series)
 - They tested positive for COVID-19 in the last 90 days and have since been cleared?

Yes No

3. Is someone that your child lives with currently experiencing any new COVID-19 symptoms and/or waiting for test results after experiencing symptoms?
 - Children (<18 years old): fever and/or chills, cough or barking cough, shortness of breath, decrease or loss of taste or smell, nausea, vomiting and/or diarrhea
 - Adults: (≥18 years old): fever and/or chills, cough or barking cough, shortness of breath, decrease or loss of taste or smell, tiredness, muscle aches

Yes No

4. In the last 10 days, has your child been identified as a "close contact" of someone who currently has COVID-19? (If public health has advised you that you do not need to self-isolate, select "No.")

Yes No

5. In the last 10 days, has someone in your household received a COVID Alert exposure notification on their cell phone?

Yes No

6. Do any of the following apply?
 - In the last 14 days, the child has travelled outside of Canada and was told to quarantine
 - In the last 14 days, the child travelled outside of Canada and was told to not attend school (please note that if the child is not fully vaccinated but is exempt from federal

quarantine because they travelled with a vaccinated companion, **they must not attend school for 14** days – Select YES if this applies to the child)

Yes No

7. Has a doctor, health care provider, or public health unit told you that your child should currently be isolating or staying home?

Yes No

8. In the last 10 days, has your child tested positive on a rapid antigen test or a home-based self-testing kit? (If your child has since tested negative on a lab-based PCR test, select "No.")

Yes No

9. I agree to follow the guidelines outlined in Oakwood's Health & Safety policies and procedures.**

I agree

I certify that the above information is true to the best of my knowledge.

Today's Date: _____

Parent/Guardian Name & Signature: _____

Submit this form to hs@oakwoodacademy.ca

Results of Screening Questions:

If you answered "YES" to any of the symptoms included under question 1:

- Your child should stay home to isolate immediately regardless of vaccination status and visit an assessment centre to be tested for COVID-19. Please note that rapid antigen testing is not to be used for those with symptoms or for contacts of known COVID-19 cases.
- Contact your child's health care provider to get advice if you are unsure if testing or another treatment is needed.
- Siblings or other people in your household must stay at home until your child showing symptoms tests negative, or is cleared by your public health unit, or is diagnosed with another illness. Household members who are fully vaccinated or previously positive for COVID-19 in the last 90 days and have since been cleared are not required to stay home.
- Should you choose to not get your child tested, your child must stay home and self-isolate with a caregiver for 10 days, or receive clearance from your health care professional/public health for your child to return to school.

If you answered "YES" to question 3:

- Your child should isolate until the person with COVID-19 symptoms in the household receives a negative test, is cleared by your local public health unit, or is diagnosed with another illness.
- If your child is fully vaccinated and does not have symptoms, they do not need to self-isolate. If your fully vaccinated child develops any symptom of COVID-19, they must self-isolate immediately and get tested.

If you answered "YES" to question 4:

- Your child should isolate for 10 days after last exposure to the COVID-19 case or as directed by Public Health. Follow Public Health's guidance for testing. Your child can only return to school **after** 10 days even if they get a negative test result, as long as they do not develop any symptoms.

- If your child develops symptoms or tests positive, contact your local public health unit or health care provider for more advice.
- If your child is fully vaccinated and does not have symptoms, they do not need to self-isolate. You must inform HS@oakwoodacademy.ca if your child or anyone in your household is a confirmed close contact of a COVID-19 case. If your fully vaccinated child develops any symptom of COVID-19, they must self-isolate immediately and get tested.

If you answered “YES” to question 5:

- Your child should isolate immediately and be tested for COVID-19 (please note, rapid antigen tests are not accepted for those identified as close contacts of known COVID-19 cases). If your child tests negative, only then can they return to school.
- If your child develops symptoms, contact your local public health unit or health care provider for more advice
- If your child is fully vaccinated and does not have symptoms, they do not need to self-isolate. You must inform HS@oakwoodacademy.ca if your child or anyone in your household has received a COVID Alert Exposure notification on their cell phone. If your fully vaccinated child develops any symptom of COVID-19, they must self-isolate immediately and get tested.

If you answered “YES” to question 6:

- Your child should remain in isolation until the end of the 14-day quarantine after return to Canada and get tested as per federal requirements
 - This also applies for unvaccinated youth ages 12-17 years of age, even if they are dependents of fully vaccinated travellers.
- If your child is fully vaccinated and does not have symptoms, they do not need to self-isolate for the 14-day quarantine period after return to Canada, but **must** avoid group settings such as schools, camps or daycares. If your fully vaccinated child develops symptoms or tests positive, contact your local public health unit or doctor/health care provider for more advice.
- Unvaccinated children under 12 years of age and dependents of fully vaccinated travellers will also be exempt from quarantine; however, they **must** avoid group settings, such as schools, camps or daycares.

If you answered “YES” to question 7:

- Your child should isolate or stay home for the recommended period of time by your public health unit, even if the individual has tested negative. Your child can return to school after they are cleared by your local public health unit.
- Siblings or other people in your household must stay at home until your child tests negative, or is cleared by your public health unit. Household members who are fully vaccinated or previously positive for COVID-19 in the last 90 days and have since been cleared are not required to stay home.

If you answered “YES” to question 8:

- Your child should isolate immediately and visit an assessment centre to get tested for COVID-19. If your child tests negative, they can return to school.
- Siblings or other people in your household must isolate until the individual who tested positive on the rapid antigen test or home-based self-testing kit tests negative on a PCR test or is cleared by the local public health unit. Household members who are fully vaccinated or previously positive for COVID-19 in the last 90 days and have since been cleared are not required to isolate.

If you answered “NO” to all questions, your child may go to school.

- As per regular protocols, all sick individuals with any symptoms of illness should stay home and seek assessment from their regular health care provider if required.
- Individuals with severe symptoms requiring emergency care should go to their nearest emergency department.

- If an individual develops symptoms outside of the list above, the Public Health Unit may recommend other measures including testing based on an assessment of the individual's symptoms and exposure history.

Families must fill out and submit a Back to School form to HS@oakwoodacademy.ca prior to returning.

**All previously documented medical conditions listed upon registration will be taken into consideration during screening.*
